Immobest Ready Mix

One component joint filler

Made in Germany

With Immobest Ready Mix you will be able to create durable, clean and safe paving joints. You will not need any machinery (mixers etc.), because the material is ready mixed. Your pavement will not be spoilt by cement residues or chemical residues. And you will not harm the environment with **Immobest Ready Mix**.

Our unique water technique allows you to rinse the material deeply and compactly into the joints. The work is so easy, clean and safe - anyone can do it! It's fun!

Choose one of our attractive colors and enjoy your beautiful paving with **Immobest Ready Mix**

sand light

sand natural

stone grey

terra cotta

black

Immobest Ready Mix Advantages:

- ◆ All weather resistant and all weather usable (in heat, cold from 0°C, rain...)
- ◆ Fast, clean and easy installation
- ◆ Permanent, solid joints - no more weeds, no more ants
- ◆ No machinery needed
- ◆ All you need is a water hose and a brush
- ◆ Rinsing technique creates particularly dense joints - no risk of voids
- ◆ The joints are permanently water-permeable, but fixed

Pre-wet the surface thoroughly, make sure the stones soak up as much water as possible.

Sweep material into the joints with a soft jet of water and soft broom.

Result: a neat and clean permanently water-permeable surface.
